ROOFTOP GUARDRAILS

VSS Compact | New Heaven, CT

The roof guardrail system from Delta Prevention is extremely popular for permanently eliminating your roof fall hazards. Thanks to multiple configurations available, they are the most versatile on the market.

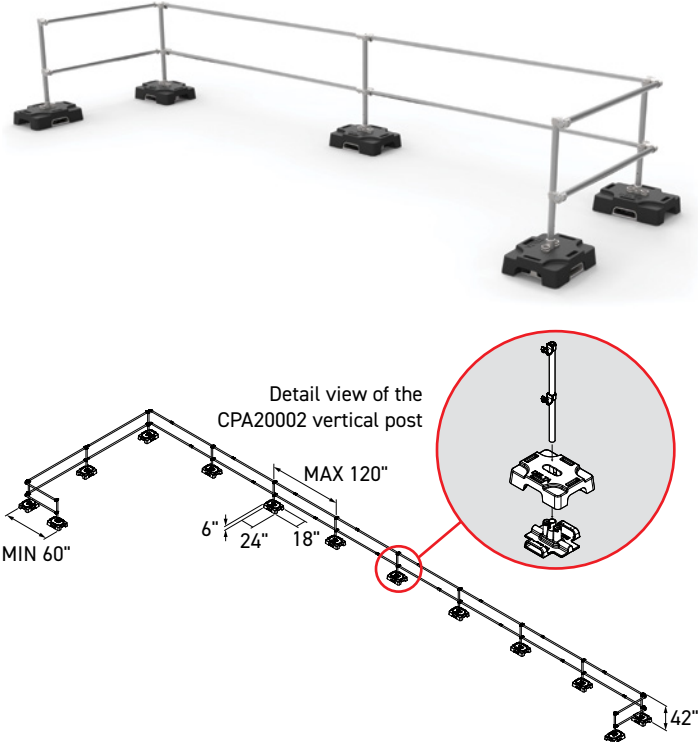

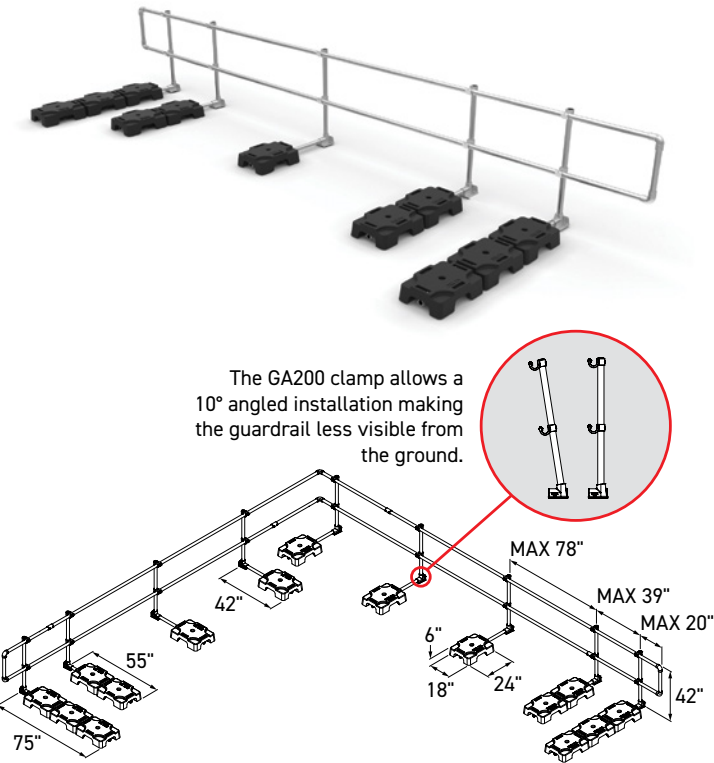

- OSHA and CAL/OSHA compliant
- Aluminium rails and recycled rubber bases
- Available in RAL color
- CAD drawings and specifications available!
- Can be customized to be compliant with local regulation.

VSS Classic | Virginia Beach, VA

VSS CLASSIC

VSS COMPACT

VSS SAFETYLINE PERMANENT WARNING LINE

The VSS SafetyLine is a warning line system used to delineate a safe working area away from fall hazards. The VSS SafetyLine is 100% compliant with the OSHA permanent warning line standards.

- Complies with OSHA
- CAD drawings and specifications available!

LADDER STABILIZER SYSTEM (LADPT101)

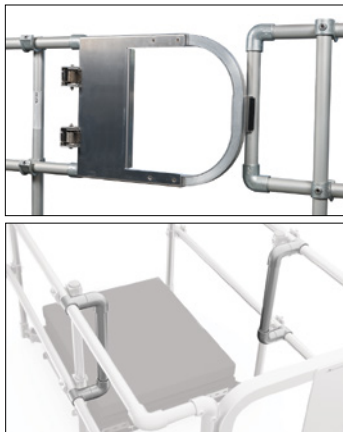

Delta Prevention's Ladder stabilizer system is designed to create safe access to roofs accessible by an extension ladder. The versatile and patented system can be installed without anchoring in a few minutes on flat roofs with or without a parapet.

GUARDRAILS FOR ROOF ACCESS HATCH

The roof hatch guardrail protects access to the hatch and provides handholds to increase safety entering or exiting the ladder. This guardrail also prevents falls into the hatch when it is left open.

- Clamp style or on counterweight
- HGKTSF01: for hatches up to 36"x36"
- HGKTOS01: for hatches up to 36"

CROSSOVER PLATFORM

Delta Prevention crossover platform is a permanent rooftop access solution designed to help workers safely move over obstacles such as pipes, ductwork, conduits, and mechanical equipment.

- Aluminum
- Ballasted
- Standard and custom configurations available
- Ships pre-assembled
